

Best Tel Teams Up with Core Business Services to Offer Innovative IT Services

MEDFORD, OR — September 4, 2008 — Best Tel, LLC, an industry leader in business communications, announced today that the company has teamed up with Core Business Services, a technology and accounting services firm, to offer innovative IT services to Oregon's businesses.

Best Tel offers comprehensive business communication solutions to all types of businesses and government organizations in the Pacific Northwest. These solutions include VoIP technology, traditional digital solutions, voice mail, advanced call processing solutions, cabling solutions including fiber, Cat 5 and Cat 6, and comprehensive voice and data networking solutions. Additionally, Best Tel offers companies training for users and administration along with the best support services in the industry.

"Outsourcing IT services has become extremely popular over the last couple of years and there is no sign of it slowing down," said Chuck Whiteley, managing partner of Best Tel. "Companies are saving money by offloading this component of their business because they no longer have to hire and train employees, maintain, monitor, and evaluate the network on a regular basis. By outsourcing IT services to a company like Core Business Services, organizations can focus all of their energy on their core competency while the experts can take care of the network and all of their data needs. We're excited about this strategic partnership and the level of service our customers will receive."

Core Business Services offers comprehensive IT consulting services for organizations that require professional assistance. The company provides quality service in

a timely manner through onsite support and managed solutions, covering all of their customer's networking needs. Typical services include ongoing network maintenance, server support and terminal services such as remote monitoring and programming.

"There are many technology companies who charge a first class rate; but at Core we believe in adding value to the overall operation," stated Scott Anderson, President of Core Business Services. "Our business model is to support our clients in a proactive manner, so as to lower the total cost of ownership while eliminating the headache that technology can be for a business. We realize that our clients are the lifeblood of our business and we want to create long term relationships and become part of their business team. Best Tel shares this same exact philosophy. They're a phenomenal organization and we're looking forward to delivering our services to their impressive customer base."

"Best Tel and Core Business Services can now bring our customers the most comprehensive solutions available for both voice and data technology," added Mr. Whiteley. "This is an exciting business partnership that will benefit our customers by making them more competitive in their marketplace as well as save them money."

ABOUT BEST TEL, LLC
