

Best Tel Remains at the Forefront of the Telecommunications Industry by Expanding its Offering to Include State-of-the-Art Fleet Management Solutions

*Reseller Relationship with Networkcar®
Enables Customers To Take Advantage of
Cost-Effective GPS Tracking Systems*

MEDFORD, OR — September 29, 2005 — Best Tel, LLC, an industry leader in telecommunications, announced today that the company has formed a reseller relationship with Networkcar, the leading provider of services for remotely monitoring the performance and location of fleet vehicles. Best Tel will offer Networkfleet, Networkcar's wireless in-vehicle technology solution, which merges patented remote diagnostic systems with GPS-based Automatic Vehicle Location technology. This relationship enables Best Tel to become the first telecommunications company to provide its customers with such a high level fleet management solution in its service area.

Networkfleet, winner of the 2005 *Telematics Update Magazine's* Best Commercial Vehicle Solution Award, helps fleet operators reduce operating costs and improve productivity by providing remote online access to detailed vehicle information ranging from vehicle location to fuel efficiency trend data, 24/7. Vehicle location and diagnostics information enable fleet managers to reduce operating costs,

improve driver productivity and more efficiently manage their assets.

Networkcar's patented diagnostic information is a key tool that allows fleet managers to identify problems at an early stage and take a more aggressive approach to maintenance. The results are increased fleet vehicle uptime and decreased costs. By getting immediate access to Networkcar vehicle speed reports, idle time data and fuel efficiency trends, fleet managers can improve driver behavior and vehicle condition and lower costs associated with accidents, poor driving habits and less than optimal maintenance regimes.

"At Best Tel, we have the exact same issue as our customers do when it comes to effectively managing a fleet of vehicles. We're constantly on the road servicing thousands of businesses in the area and we need to do it as efficient as possible," said Chuck Whiteley, managing partner for Best Tel. "After conducting a thorough analysis of fleet management solution providers, we identified Networkcar as an ideal partner because of their superior technology and the phenomenal reputation they have in the industry. Their value proposition was so powerful that we felt it was important to introduce such an

innovative tool to our customer base. We strongly believe that it is our duty as our customers' telecommunications provider to bring solutions that increases their profitability and gives them a competitive advantage in their marketplace."

ABOUT BEST TEL, LLC

Chuck Whiteley and his business partner, Dennis Poulin, are owners of Best-Tel LLC, a member of the Technology Assurance Group (TAG). Best-Tel has built a team of professional voice and data specialists dedicated to the highest levels of customer support. Best-Tel's pattern of steady growth reflects their commitment to keeping pace with the constantly evolving telecommunications technology arena, and the dramatic expansion of the Pacific Northwest's business market. With offices located along the I-5 Corridor in Portland, Eugene, Medford, and Seattle, Best Tel is uniquely positioned to respond quickly and effectively to a wide range of customer equipment and service requirements.
